Questions

Reason for inquiry? (Failure mode: Premature wear? Compression? New design?)	<input type="text"/>
If the bearing is oscillating, what is the acceleration, cycles per minute, and dwell time?	<input type="text"/>
Does the bearing experience shock or excessive vibration?	<input type="text"/>
Are the temperature variations (if any) gradual or rapid?	<input type="text"/>
Type of Media: air, gas, or liquid? Intermittent or constant?	<input type="text"/>
Is the environment abrasive in nature?	<input type="text"/>
Electrical Dissipation, Conductivity or Insulation Requirements?	<input type="text"/>
Thermal Transfer or Insulation Requirements?	<input type="text"/>
Regulatory Requirements? FDA, NSF, USDA, 3A or USP?	<input type="text"/>
What is the Shaft Orientation? (Vertical, Horizontal, or Other)	<input type="text"/>
Is shaft misaligned or have an applied moment	<input type="text"/>
Is the shaft treated or coated? (hardcoat, ENP, chrome, TFE)	<input type="text"/>
Smoke or Flammability Requirements?	<input type="text"/>
Chemicals and Materials in contact with the bearing?	<input type="text"/>
Other Applicable Information?	<input type="text"/>
